Category: [AV Furniture & Accessories](#)

PRODUCT DESCRIPTION

In the same way as every musical performance needs a stage so a HiFi needs a stage to bring the music to life in your home. Twenty years ago Quadraspire set out to develop a modular rack - the Q4 - that could support a variety of Hi-Fi systems and deliver acoustic performance with style. This was achieved by combining solid aluminium columns with specially engineered shelves to create a light and rigid construction to deliver a clearer, cleaner musical performance.

The QAVM is a 3 shelve, double width version of the Q4 and is available in 6 different column heights to accommodate different sized components. Additional shelves or column heights can be easily interchanged if your system changes. A choice of spike or flat feet are included as standard with your rack, casters are available as an optional extra.

KEY FEATURES

- Wooden shelves with real wood veneers
- Aluminium columns eliminate residual magnetism
 - Made in Britan
- Specially engineered to reduce mass and resonance to deliver a clearer, cleaner musical performance

- Choice of finishes & column heights
- Available with spike feet, flat feet or castors
