

**THOR TECHNOLOGIES PS10 SMART  
POWER STATION**

**\$1,999.00**

**SKU:** PS10

**Category:** [Power Filters & Conditioners](#)

**GALLERY IMAGES**

**PRODUCT DESCRIPTION**

The THOR PS10 Smart Station produces pure, unpolluted 240V/20V sinewave power 24/7 providing not only superb protection against surges, spikes and brownouts but also a noticeable sonic improvement to your audio system.

On top of the pristine power produced by the Smart Station THOR have included their State of the Art, 8 outlet, Smart Board. When attached to the Smart Power Station it delivers DOUBLE the protection and DOUBLE the filtration, incorporating our Dynamic Active Tracking Technology. In addition to this, there are

3 isolated banks on the Smart Board ensuring there is no "cross-talk" or interference between components connected after the Smart Station. Add the 5 separate earth lines which is a hum/loop reducing feature and performance enhancement is almost a given.

This configuration can be argued as being the best combination available for providing pure and precise 240 (or 220) volts to your valuable electrical equipment. Equipment that was designed to run on 240 (or 220) volt power ensuring you get maximum performance and enjoyment for many years. When it comes to minimising risk, THOR makes no wild or glossy promises. Their products do what they say they do - it is that simple!

## KEY FEATURES

- FEATURING NEW customised front facia and blue LCD screen
  - Double Filtration And Double Protection
  - Combination Equals Total Power Management
  - Pure Unpolluted 240V Sinewave Power 24/7
    - Soft Start - Gentle Power Build Up
  - Whisper Quiet Servo Motor For Voltage Calibration
    - Microprocessor Controls
- Dual Led Display Indicating Incoming Power And Output Power
- 10 Other Led Alerts Showing Various Power Changes Instantly
- Frontline Filtering And Surge Protection Through Power Station
- Double Filter Trap And Double Voltage Protection Through Custom 8 Way Smart Board
  - Incorporating Dynamic Active Tracking Filtering Technology
    - 3 In 1 Isolation
      - 8 Outlets
    - Data & Aerial Protection
      - Cable TV Adaptor
  - Fibre Optic & Broadband Compatible

## SPECIFICATIONS

**Supply Voltage:** 240/Vac 50Hz

**Maximum Current Rating:** 10amps/2400 W (Va)

**Wave Form:** Pure Sine Wave

**Operating Voltage:** 180v - 260v

**Incoming Voltage out of designed range (i.e. 180v - 260v):** if input was 270v then output would be approx 250v to 255v

**Incoming Voltage out of designed range (i.e. 180v - 260v):** if input voltage was 140v then

output would be approx 230v - 235v

**Safety Approval No.:** RCM 5287

**Double Filtration and Protection Management:** A12 Smart Board included

**Dimensions (WxHxD):** 436 x 195 x 380mm
